# ALCOHOL and CRIME in WYOMING

**Wyoming Association of Sheriffs  
and Chiefs of Police**

WYOMING DEPARTMENT OF  
TRANSPORTATION – Highway Safety Program

ALCOHOL AND CRIME IN WYOMING:  
2010

April 2011

The analysis of the data collected by the Wyoming Association of Sheriffs and Chiefs of Police and the printing of this report was made possible through the assistance of Federal 402 Highway Safety funds received from the Wyoming Department of Transportation – Highway Safety Program. The Project was managed by Johnson and Associates of Douglas, Wyoming. The report was authored by Ernest L. Johnson, Director of Services.

### INTRODUCTION

In spring of 2005, the Wyoming Association of Sheriffs and Chiefs of Police received grant funding from the Wyoming Department of Transportation – Highway Safety Program to collect and evaluate alcohol-related arrest data in ten counties in Wyoming for a period of six months. Although it had long been suspected that alcohol was a factor in a large number of custodial arrests in Wyoming, reliable data had not been available previously to more accurately determine the scope and impact of alcohol on crime in this state.

This pilot project was initiated with the expressed purpose of formulating effective enforcement strategies aimed at reducing the number of alcohol related crimes and traffic crashes in Wyoming. The data collection process has continued since 2005, has been refined and was expanded to include data collection in all twenty-three counties in 2006. The collection of data was then extended to a full twelve-month period in 2008.

A sufficient amount of alcohol-related arrest data has now been collected which can be analyzed for the purpose of identifying trends in alcohol involvement in crime in Wyoming. Consistent patterns of alcohol involvement for certain crimes are now more evident and the times when these crimes are occurring more predictable.

***To date, information has been collected from a total of 80,869 persons who were arrested and subsequently detained in a detention facility in Wyoming. Specific information that has been collected during the book-in process includes the following:***

- Type of offense
- Whether alcohol or drugs were involved
- Location of last consumption and point of sale
- Known blood alcohol content levels for alcohol related arrests; and
- Demographic information

Although the data fields and the process for collection have been standardized and relatively consistent for the past five years, the time periods for collection and reporting have not. This was due mainly to the timing and availability of grant funding. This inconsistency in reporting periods have made it difficult to compare statistics from year-to-year, as well as with state traffic crash data. Beginning this year, the collection period has now been standardized and the analysis and report will be issued on a calendar year basis – January through December.

---

## Alcohol and Crime in Wyoming - 2010

---

The Wyoming Association of Sheriffs and Chiefs of Police has published the results and analysis of the data collection efforts each year for the last five years in two separate reports. The main report provides statewide statistics and averages, along with comparisons of county statistics in specific categories. The accompanying supplemental report provides county, community and local law enforcement agency specific statistics. These reports can be accessed online on the following websites <http://wascop.com> and <http://jandaconsulting.com>

*The information collected from a total of 18,946 persons who were arrested and subsequently detained in a county detention facility in Wyoming during this twelve-month period (January 1 through December 31, 2010) confirms what law enforcement officers who patrol the highways and who respond to calls for service in Wyoming already know from experience – alcohol is the major contributing factor in situations that result in someone going to jail.*

### EXECUTIVE SUMMARY

This Executive Summary highlights a few of the significant findings contained in this report. It focuses on issues that are of obvious concern or which may be of greater interest to the general public; however, a careful review of other relevant findings and statistics contained in the main body of this report is essential in order to gain a more complete perspective of the impact of alcohol on crime in Wyoming.

This report contains an analysis of alcohol-related arrest information collected in all twenty-three counties in Wyoming during a twelve-month time period (January 1, through December 31, 2010) by the Wyoming Association of Sheriffs and Chiefs of Police. ***Information was collected from a total of 18,946 persons who were arrested and subsequently detained in a county detention facility.*** The alcohol-related arrest data contained in this report provides a detailed, statistical picture of the impact of alcohol abuse on crime in Wyoming.

The profile of the average person taken to jail in Wyoming continues to be relatively consistent with previous years. Eight out of ten times it was a male – average age 34. Ten percent of the time it was an out-of-state visitor and 5.7% of the time it was an in-state visitor. Juvenile arrests that resulted in detention in a county detention facility accounted for less than 2% of the total custodial arrests.

A review of the data collected from persons arrested and subsequently taken to jail indicates that Wyoming continues to be relatively safe from what is generally considered to be “serious” crime. The number of persons who are arrested for felonies are relatively low when compared to the number of persons arrested for minor crimes (misdemeanors). Felony arrests accounted for less than 7% of the total arrests statewide.

***Although Wyoming is relatively “safe” from what is generally considered to be serious crime, the high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence, and the high levels of blood alcohol content for drivers arrested represent a real and significant threat to public safety.***

A total of 18,964 persons were arrested statewide and taken to jail in 2010 - and more than three out of four times the arrest involved alcohol and/or other drugs. *The level of alcohol involvement reported in the 80,869 reported arrests over the last five years indicates that alcohol is, and continues to be, the drug that has the greatest influence on crime in Wyoming.*

- Alcohol was involved in 72.03% of all custodial arrests.
- Alcohol was involved in 75.22% of all misdemeanor arrests.
- Methamphetamine was involved in 2.53% of the 18,946 reported arrests.
- “Other drugs” were involved in 9.98% of the reported arrests.

***79.14% of the 18,946 arrests statewide involved alcohol and/or other drugs.***

The high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence and the high levels of blood alcohol content (BAC) recorded for this twelve-month reporting period equals or surpasses the statistics that have been recorded during each of the previous four years<sup>1</sup>.

***The statistics for alcohol involved arrests, public intoxication and DUI arrests have continued to show an upward trend during the last five years.***

- Arrests for public intoxication accounted for 16.99% of all arrests.
- The average blood alcohol content for persons arrested for public intoxication was 0.2317.
- Driving under the influence arrests accounted for 35.83% of all arrests.
- The average reported blood alcohol content for DUI arrests statewide was 0.1525.<sup>2</sup>
- 46% of persons arrested for DUI had a reported BAC level above 0.16 and 8% had a BAC of 0.24 or greater.
- The average reported BAC for 564 persons who were arrested for DUI after being involved in a traffic crash was 0.1659.
- The age group (in 5-year increments) with the highest percentage of DUI arrests was age 21-25 (19%), followed by age 26-30 (16%) and 31-35 (11%).

---

<sup>1</sup> Alcohol and Crime in Wyoming 2006-2008 - May 2009; and Alcohol and Crime in Wyoming 2009-2010 – September 2010, Wyoming Association of Sheriffs and Chiefs of Police

<sup>2</sup> In Wyoming, a person driving with a blood alcohol content of 0.08 is legally presumed to be impaired.

*In order to grasp the significance of these blood alcohol content statistics, it should be noted that a physically fit male who weighs 180 pounds would have to consume at least seven drinks in one hour in order to achieve a BAC of 0.15 – a female weighing 120 pounds would have to consume five drinks in one hour.*

Please refer to the Alcohol Impairment Educational Guides for males and females in the Attachments Section of this report for information about the level of impairment for other body weights and drinks consumed.

**CONCLUSION:** The statistics in this report provide evidence of the high level of alcohol abuse statewide. The high percentage of alcohol involved arrests (72.03%), the inordinate number of arrests for public intoxication (4,398) and DUI (5,862) and the high levels of BAC recorded for these individuals (average BAC: 0.2317 for public intoxication and 0.1525 for DUI) appear to validate the concerns about alcohol abuse expressed by Wyoming residents in the most recent statewide public opinion survey<sup>3</sup>. Some excerpts from the survey that involved 4,699 Wyoming residents:

- 77.8% view alcohol abuse by Wyoming adults as a serious or somewhat serious problem
- When Wyoming residents were asked whether they would support a state law that would prohibit selling or serving alcohol to someone who is obviously intoxicated:
  - 76.8% strongly supported such a law
  - 13.6% somewhat supported such a law
- 86.8% of Wyoming residents believe that drinking and driving in their community is a serious or somewhat serious problem.

This report includes statewide statistics and averages, along with comparisons of county statistics in specific categories. In addition, there are approximately one hundred pages of data in a supplemental report that provides county, community and local law enforcement agency specific statistics.

*The statistics contained in this report identify significant public safety issues which merit prompt further discussion, analysis and action by local law enforcement, citizens and state/community leaders.*

---

<sup>3</sup> Wyoming Alcohol Use Issues Survey, Wyoming Survey & Analysis Center, October 2006

## SIGNIFICANT STATISTICS AND FINDINGS

The high percentage of alcohol-involved arrests in Wyoming, the inordinate number of arrests for public intoxication and driving under the influence - and the reported high level of blood alcohol content equaled or surpassed the statistics recorded during each of the previous three years. The statistics contained in this report identify serious public safety concerns which hopefully will prompt further discussion and analysis by local law enforcement, citizens and state/community leaders.

Detailed charts and graphs of this data are provided in the Data/Statistics section of this report. The number and percentage of arrests are provided for every listed category of concern on a statewide basis, as well as by county and by law enforcement agency for more in-depth comparison purposes. Listed below are a few of the noteworthy alcohol-related statistics and findings in this report.

\*\*\*\*\*

- **Alcohol was a factor in 72.03% of the custodial arrests in Wyoming.**
  - Counties with significantly higher statistics:
    - Teton – 80.00%
    - Albany – 83.69%
    - Crook – 95.18%
- **Alcohol was involved in 75.22% of the misdemeanor arrests.**
- **Methamphetamine was involved in 2.53% of the arrests statewide.**
  - Counties with significantly higher statistics:
    - Sweetwater – 6.45%
    - Johnson – 7.86%
    - Washakie – 7.98%
- **“Other” drugs were involved in 9.98% of the reported arrests statewide.**
  - Counties with significantly higher statistics:
    - Sweetwater – 19.88%
    - Johnson – 21.40%
    - Platte – 22.77%
    - Carbon – 23.99%
- **Arrests for Public Intoxication accounted for 16.99% of all arrests statewide.**  
*(The statewide average does not include 1,620 persons who were admitted into the Fremont County Alcohol Crisis Center for public intoxication)*
  - Counties with significantly higher statistics:
    - Natrona – 19.69%
    - Teton – 26.80%
    - Fremont – 34.66%

### Significant Statistics and Findings (continued)

- **The average blood alcohol content for all persons arrested for public intoxication was 0.2317.**
  - Counties with significantly higher statistics:
    - Washakie – 0.2676
    - Fremont – 0.2427
    - Sublette – 0.2425
- **Driving under the influence (DUI) arrests accounted for 35.83% of all arrests statewide.**
  - Counties with significantly higher statistics:
    - Crook – 77.11%
    - Weston – 56.72%
    - Albany, Big Horn, Campbell, Goshen and Sublette - 50% or above
- **2.6% of the arrests for DUI involved drugs;**
  - Counties with significantly higher statistics:
    - Platte – 11.88%
    - Big Horn – 8.33
    - Lincoln – 6.12%
- **12.97% of traffic crashes resulting in arrests involved drugs.**
  - Counties with significantly higher statistics:
    - Carbon – 31.82%
    - Big Horn – 30%
    - Crook, Hot Springs and Park – 20%
- **The average BAC reported for 564 traffic crashes that involved alcohol was 0.1659.**
- **The average blood alcohol content (BAC) reported for 5,862 persons arrested for driving under the influence statewide was 0.1525.**
  - Counties with significantly higher statistics:
    - Goshen - 0.1679
    - Hot Springs - 0.1718
    - Big Horn - 0.1803
- **46% of the persons arrested for driving under the influence had average blood alcohol content above 0.16.**
  - 8% had a BAC of 0.24 or greater
  - 12% had a BAC between 0.20 and 0.239
  - 26% had a BAC between 0.16 and 0.199

### Significant Statistics and Findings (continued)

- **6.93% of all persons arrested for driving under the influence (DUI) were under the age of 21.**
- **Juveniles accounted for 1.8% of the arrests statewide.**
  - It should be noted that the data in this report does not represent a complete accounting of juvenile arrests as these arrests often do not result in detention in a county facility.
- **48.42% of the juvenile arrests involved alcohol.**
- **1.15% of the juvenile arrests involved methamphetamine.**
- **15.19% of the juvenile arrests involved “other” drugs.**
- **389 minors arrested for alcohol-related offenses reported obtaining alcohol at:**
  - Party – 37.28%
  - Home – 28.28%
  - Bar – 19.79%
  - Liquor Store – 14.40%
  - Drive-up – <1%

### PROJECT DESIGN AND IMPLEMENTATION

The Wyoming Association of Sheriffs and Chiefs of Police contracted with Johnson and Associates, a Wyoming based management consulting firm, to manage and staff this project – to create the master database, to collect and input data, to make presentations to select groups and to author the final report. The Association had previously contracted with Johnson and Associates to manage and staff the previous projects in 2005, 2006, 2007, 2008 and to conduct a three-year trends analysis in 2009.

A task force comprised of administrators and detention facility personnel from each of the county law enforcement agencies involved in the initial data collection efforts in 2005 determined the scope and intent of the project and provided specific direction for its implementation. In the following years, all law enforcement and detention facility administrators in the state were involved in deciding the appropriate fields for collection of data, selecting the subject areas that would be targeted for analysis and refining the process and procedures for collecting the information.

A supply of reporting forms and self-addressed stamped envelopes were provided to all detention facilities in the state - along with an instruction sheet for processing the completed reporting forms. In addition, all detention facility personnel who were assigned the responsibility to oversee their agencies' data collection were provided individual orientations. All completed reporting forms were submitted to Johnson and Associates for data entry on a weekly basis.

The master database for this project was created using Microsoft Access in a manner that will allow “harvesting” of additional information in the future should a need or particular area of interest arise. The data in this report is presented by “county” and by “department,” by actual numbers and percentages, and by various categories of interest. The information was assembled in this manner in order to assist law enforcement administrators, as well as community leaders, to better analyze the information and to facilitate follow-up inquiries of notable concerns.

### DATA COLLECTION

A one-page reporting form consisting of fill-in or checked boxes was constructed and refined during the course of this project. It is estimated that the form requires the booking and/or arresting officer two-to-three minutes to fill out during the book-in process. Specific information that was collected during the book-in process include: type of offense, whether alcohol was involved; whether drugs were involved; location of last consumption and point of sale; known blood alcohol content levels for arrests involving public intoxication, driving under the influence and minors in possession; and demographic information. (Please refer to page 44 for a sample of the reporting form)

### Data Collection (continued)

A total of 18,946 reporting forms were submitted by the twenty-three county detention facilities and the Fremont County Alcohol Crisis Center during the twelve-month data collection period January 1 through December 31, 2010. Although officers were instructed to complete a form for every person booked into the detention facility, they did not always do so. Only “field” arrests resulting in a person being booked into a detention facility have been tabulated – these reported “field” arrests totaled 15,914.

### DATA /STATISTICS

All information contained in the reporting forms that were submitted by the participating counties was entered into a master data base by week and by month. This information was subsequently assembled by category, by county, and by department in order to facilitate appropriate comparisons and further analysis.

A detailed breakdown of information for each county is available in a separate Supplemental Report.<sup>4</sup> A sample of the county statistics is included in this report. Natrona County was selected as the sample to be included as this county generated the greatest number of arrest statistics.

The alcohol-related arrest data in this report is presented in a series of tables and graphs:

- ❖ Tables – Number of Arrests and Percentages
- ❖ Pie Chart – Methamphetamine, Alcohol and Other Drugs
- ❖ Tables – Felony/Misdemeanor Arrests Involving Alcohol
  - Alcohol Involvement by Category of Arrest
- ❖ Bar Graphs – Alcohol Arrests Percentages, BAC
- ❖ Pie Graphs – DUI, BAC, Traffic Crash Statistics
- ❖ Tables and Bar Graphs – Juvenile Statistics
- ❖ Pie Graph – Juvenile Demographics, Where Minors Obtain Alcohol
- ❖ Table – Natrona County Statistics (Sample County Statistics)
- ❖ Table – Total reports compared to Actual Custodial Arrests

---

<sup>4</sup> A PDF of this Supplemental Report can be downloaded from the following websites: <http://wascop.com> and <http://jandaconsulting.com>

\* Total of percents in Location of Consumption and Point of Sale categories may exceed 100% due to single arrests involving more than one location or point of sale.

### ACKNOWLEDGEMENTS

This project was accomplished due to the committed support of all the law enforcement administrators in Wyoming, and in particular, the Sheriffs' generous commitment of agency resources. The day-to-day supervision and weekly submittal of the project reporting forms and the individual efforts of the hundreds of arresting/detention officers who filled out the reporting forms should be acknowledged as well. Their collective efforts were absolutely essential to the overall success of this project.

## 2009-2010 - EVALUATION OF ALCOHOL FACTORS IN CUSTODIAL ARRESTS

### Albany County Sheriff's Department

OFFICER or CR NUMBER \_\_\_\_\_ DATE \_\_\_\_\_

*The following information is being collected in an effort to evaluate alcohol factors in custodial and DUI arrests in all twenty-three counties in Wyoming. This data will be collected for a period of 12 months (July 1, 2009 through June 30, 2010) and will be used for statistical analysis purposes only. Please fill out a separate form for every person being booked into your facility.*

*Please fill in the information based on your knowledge of the case, personal observations, and/or questioning of the person arrested. The person should be advised that no case sensitive information is being recorded and that this information is being collected for statistical purposes only. A copy of the final report will be provided to every participating agency. Thanks for your help.*

**DEPARTMENT** (Circle agency affecting arrest; if agency is not listed please fill in "Other")

Albany      Laramie      UW PD      WHP      G&F      Other: \_\_\_\_\_

**GENDER** (Circle one):    Male            Female            **AGE:** \_\_\_\_\_

**DRIVING IMPAIRED**  
AC = .05% - .07%

Subtract .01% for each 40 minutes of drinking.  
One drink is 1.25 ounces of 80 proof liquor,  
12 ounces of beer, or 5 ounces of table wine.

**LEGALLY INTOXICATED**  
AC = .08% AND UP

**NOTE: PERSONS UNDER THE AGE OF 21 CAN FACE CRIMINAL PENALTIES IF CAUGHT DRIVING WITH A DETECTABLE ALCOHOL CONCENTRATION OF 0.02% OR MORE.**

\* Guide developed by J.Anderle, Laramie PD and Mike Moore, Wyoming Chemical Testing

**DRIVING IMPAIRED**  
AC = .05% - .07%

Subtract .01% for each 40 minutes of drinking.  
One drink is 1.25 ounces of 80 proof liquor,  
12 ounces of beer, or 5 ounces of table wine.

**LEGALLY INTOXICATED**  
AC = .08% AND UP

**NOTE: PERSONS UNDER THE AGE OF 21 CAN FACE CRIMINAL PENALTIES IF CAUGHT DRIVING WITH A DETECTABLE ALCOHOL CONCENTRATION OF 0.02% OR MORE.**

\* Guide developed by J.Anderle, Laramie PD and Mike Moore, Wyoming Chemical Testing

### RELATED EDUCATION & EXPERIENCE:

- Twenty-four years experience as an administrator of a state agency with direct responsibility for budget development and administration, planning, organizing, directing, staffing, and program services delivery.
- Masters degree in Public Administration; over twenty years experience training and working with executives to achieve excellence in government, manage and implement change, increase organizational effectiveness and maximize program efficiency.
- Conducted in-depth management studies for criminal justice agencies for the states of Massachusetts and New Hampshire. These studies assessed the delivery of program services by agencies with statewide responsibilities and provided recommendations for increasing organizational efficiency and agency credibility.
- Over thirty-five years of experience in researching, writing, and administering a variety of federal and state grants. Grants involved in excess of several million dollars for a wide variety of purposes: personnel, equipment, training, research and providing services with targeted priorities.
- Extensive experience in researching, evaluating and implementing a wide variety of projects. These projects varied in scope and duration, and many required the involvement and partnership of multiple agencies and personnel throughout the state, as well as the enactment of state legislation.
  - Evaluation performed for the Substance Abuse Division - WDH – “Responsible Server Training Program” – October 2002
  - Managed the Wyoming First Lady’s Initiative to Reduce Underage Drinking – November 2004 to September 2006
  - Currently serving as the Facilitator for the Wyoming Seat Belt Coalition
  - Managed project and authored report: A Comprehensive Review of Alcohol State Statutes: Findings and Recommendations for Reducing Underage and Binge Drinking in Wyoming - 2008
