Hi Kelly,

There were three syphilis cases in Natrona in 2017 (2 late latent and 1 early latent).
There were two syphilis cases in Natrona in 2016 (both primary).

Thanks,
Courtney

Hi Courtney:

I'm working with my staff member, Sara Pederson, on our Community Health Needs Assessment.
Can you tell me how many cases of syphilis Natrona County had in 2016 and 2017?

This information may help me with the annual report as well. Infectious cases that were investigated in 2017 by the health department is 3 cases of syphilis and 1 case of pertussis? Or did we investigate these cases? I asked Jamie and she told me 1 case of pertussis but to verify that with you.

Thanks,

Sara Pederson
