It looks like we are showing 7 LTBI that we added into our registry that lived in Natrona, 4 of which were case managed by CNCHD according to what's on file. There was one active in 2017 managed by CNCHD. Since we are not primary payer on all we may not be able to see who picked up their medications to actually start treatment.

Thank you. Can you tell me the # of Natrona County residents who received WDH-sponsored LTBI treatment in 2017? I'll compare to our internal clinic case management list.

Hi Kelly,

LTBI is not reportable, we only track who we provide meds to. From 2012-2016 there were 0 cases of active TB reported in Natrona.

Thanks!

Hi Courtney:

Also for our Community Health Needs Assessment, can I get number of cases in Natrona County of active TB and then number of cases of LTBI from 2012-2016?
