<sup>1</sup>Percentages are based on the number of births for each year to women who reported smoking before pregnancy. Percentages are rounded and may not add to 100% due to rounding error. Please be cautious when interpreting small numbers (fewer than 20 events) because these data do not meet the requirement for a minimum degree of accuracy.

<sup>2</sup>Women who quit smoking during pregnancy reported smoking the first or second trimester but reported that they did not smoke in the third. Cessation rate calculations may be found in the following NCHS publication: *Curtin SC & Mathews TJ. (2016). Smoking Prevalence and Cessation Before and During Pregnancy: Data From the Birth Certificate, 2014. National Vital Statistics Reports 65 (1).*

<sup>3</sup>Numbers less than five are not displayed (\*).

**Data Source:** Birth Certificate Data from Vital Statistics Services, Wyoming Department of Health. **Information compiled by:** Maternal and Child Health Epidemiology
